GUJARKHAN CAMPUS, LUDHIANA
(2020-21)

7.1.3

Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste

SUPPORTING DOCUMENTS

Describe the facilities in the Institution for the management of the following types of degradable and non-degradable waste

- ✓ **Solid waste management:** Bins have been kept on each floor in classrooms, laboratories and toilets. During College hours students and staff throw the waste materials inside the bins. Garden waste is collected and used for making manure for garden. A lot of paper was saved because online classes were taken in this session.
- ✓ **Liquid waste management:** The liquid wastes are generated in our College in laboratories of Home Science. Bins are kept in the laboratories.

Since our country dealt with deadly pandemic during the session, all the educational institutions were closed for physical presence of students. Apart from this, teaching was carried out in online mode, with teachers majorly working from home, not many efforts could be taken in management of wastes at the college campus.
