**Introduction:**

The Ministry of Education's Unnat Bharat Abhiyan (UBA) completes a decade, redefining the role of higher education in rural development. UBA was initially launched by the Ministry of Human Resource Development (MHRD) in 2014. This approach aims to locally meet essential needs like food, clothing, shelter, sanitation, healthcare, energy, livelihood, transportation, and education of rural villagers. The Unnat Bharat Abhiyan (UBA) emerges as a vital and challenging initiative in steering towards comprehensive rural development. The total active Participating Institutes (PIs) are 4636 in [Unnat Bharat Abhiyan](#) (UBA) which act as catalysts for rural development by adopting five villages in consultation with District Collectors, conducting field studies, implementing government schemes, and bringing academic expertise to solve local problems in education, health, infrastructure, and socio-economic areas, bridging the gap between rural communities and higher education for holistic progress.

The **vision** of Unnat Bharat Abhiyan is to enable Higher Educational Institutions (HEIs) to work with the rural people and identify the challenges they face and come up with solutions for their sustainable development.

The **mission** is to establish strong coordination between educational institutions, implementing agencies, and local community stakeholders so that development efforts can be effectively carried out at the grassroots level. It seeks to realign higher education curricula and research to better address contemporary societal and rural needs, helping students gain a deeper understanding of village-level issues and holistic development.
